

**The Biospecimen Science Literature Compilation** is the work product of members of the ISBER Biospecimen Science Working Group. Members of the 2008-2009 Working Group were responsible for the first edition of the Literature Compilation, which was published online in February 2009. The current (second) edition of the Literature Compilation was adapted from the first edition, was the responsibility of the 2009-2010 Working Group, and also includes a new section on Environmental Biospecimen Science, which was prepared by Working Group member Erica Benson with the assistance of her colleague Keith Harding. In addition to thanking Drs. Benson and Harding, ISBER especially acknowledges the special contributions of Michael Barnes, Fay Betsou, and Yvonne DeSouza toward this second edition.
